	1	/
Ţ	E: RUMORS CONCERNING REPLACEMENT	2-2-1
ı	OF ADMIRAD HILLENKOETTER,	O'Comments.

RUMORS CONCERNING REPLACEMENT OF ADMIRAD HILLENKOETTER, DIRECTOR OF SIA

While discussing IAC matters with Admiral Hillenkoetter, he voluntarily advised Agent DeLoach that he had paid a call to President Truman yesterday morning, October 26, 1949, after hearing an 8:00 a.m. news broadcast reflecting that he is to be replaced by former Under-secretary of State Robert Lovett. He indicated that the President had advised him that there was no truth whatsoever to the runor and that Hillenkoetter would undoubtedly remain as Director of CIA for a long period of time.

The Admiral continued that three weeks ago he had contacted Mr. Lovett and asked him point blank if there was any truth to the rumors about his assuming the Directorship of CIA. He stated that Mr. Lovett advised him at that time that "he wouldn't have the job even if it were tendered to him."

Hillenkoetter indicated that this was the second time he had been to see President Truman about this matter. He stated that the President on both occasions had definitely assured him of his continuing on as Director of CIA.

Dear Sir:

T am interested in obtaining information concerning the Central Intelligence Agency in connection with securing a position with this organization.

I am a veteran of World War II having spent four years in Naval Aviation. I will graduate from Drake University in January 1950 with a B.S. in Accounting. I would appreciate it if you would send me any available information.

Yours truly,

MELIOLARIUM FOR MR. H. B. FLETCHER

RE: DREW PEARSON
Information Concerning

General Bolling advised Mr. Reynolds in extreme confidence that he was visited on November 2 by a Mr. Blumenthal, who professed to be an employee of Drew Pearson. Blumenthal indicated to General Bolling that Pearson had received information that the Army had a group of soldiers working in the German Military Document Section. These soldiers were captured Germans who have applied for American citizenship and who now are enlisted men in the Army. It was alleged that certain of these individuals are malcontents and have been alleged to have stated that they were tired of the United States; they preferred Germany; they preferred living under the Hitler Regime, and remarks of a similar nature. Blumenthal indicated to General Bolling that his purpose for calling was to verify whether or not the Germany Military Document Section was a part of the Intelligence Division, since Mr. Pearson intended to use this item on a broadcast, Sunday afternoon, November 6.

General Bolling advised Mr. Reynolds that he told Blumenthal that the German Military Document Section is not a part of the Intelligence Division. He also told Blumenthal that he intended to immediately institute an investigation of this matter and elicited a promise from Blumenthal that as long as the Army intended to do something about these allegations, that Pearson would not use the story on his broadcast.

General Bolling advised Mr. Reynolds further in confidence that

Infant American Spy System Is Beginning to Get Results

plete surprise atom-bomb attack port on changes made as a result on the United States? One reply can be given confidently: This Government is now using its eyes and ears as it has never done before in time of peace.

The American spy system, although still in its infancy, is robust and growing. Men who have had the opportunity to study it close up say that if it had been in existence in 1941 the Japanese probably would not have succeeded in their attack on Pearl Harbor.

It has plenty of growing pains, but it entered the field of international snooping hundreds of years after other great powers. And espionage in the atomic age is infinitely complex.

Only Part of Job

The American cloak-and-dagger men now working noiselessly and invisibly throughout the world are doing only a fraction of the job.

Experts in commerce and industry, doctors, economists and scientists extract some of the most valuable information from innumerable sources wide open to the public. such as foreign books and technical reports

The most exacting job of all lies with the few men at the top who must evaluate the information-decide what all the facts reveal about the strength and intentions of foreign powers.

Has 5 Major Parts

The set-up of the American intelligence system, known as the Central Intelligence Agency (CIA). was described in some detail by a task force report of the Hoover ries, housing and committee.

Since its release, the director of

Washington, Oct. 31—(AP)— CIA, Rear Admiral Roscoe H. Hil-Could some nation launch a com- lenkoeter, has given Congress a reof the Hoover survey.

The Central Intelligence Agency is divided into five major offices.

Three are charged with the collection of information. They do it by espionage in other countries, by examining foreign documents and monitoring foreign broadcasts. CIA's five monitoring stations hear an average of 2,000,000 words a day.

A fourth unit is the Office of Colfection and Dissemination. maintains a vast index system of facts and photographs on foreign industry, science, personalities, etc.

ports and estimates. Its job is to evaluate intelligence and prepare intelligence reports for the Presi-dent and other officials concerned with high policy.

It has six regional branches covering geographical areas and four concerned with economics, science;

(Needed in Every Medicine Chest)

transportation organizations.

The regional branches assemble raw material from thousands of cables and reports supplied by the State Department, the Defense Departments, CIA's own clandestine agents and from various other U.S. agencies which have missions overseas.

Reviewed by Higher-ups

The regional branch makes an 'intelligence estimate." This is reviewed by the director of CIA. If the material is controversial, it is reviewed by the highest intelligence tribunal of all, the Intelligence Advisory Committee (IAC).

IAC is composed of the principal intelligence officers of the State, Army, Navy and Air Force departments, the Joint Chiefs of Staff and the Atomic Energy Commission.

Some CIA agents' work in other The fifth unit is the office of re- government departments as a

SUBJECT: REQUEST OF ADVIRAL HILLENKOETTER FOR COPY OF CORRESPONDENCE RELATIVE TO

PAOSPECTIVE APPLICANTS

Inselligence agence

While discussing other matters recently with Admiral Hillenkoetter, Director of CIA, he advised Agent De Loach that CIA was experiencing serious difficulties in replying to various Congressmen who desired to place personnel in CIA. He stated that CIA had also been criticized as to the abrupt manner in which they replied to letters of prospective applicants. He desired to ascertain if he personally could No furnished with copies of correspondence that the Bureau had transmitted to applicants for positions with the FBI. In brief, Admiral Hillenkoetter desired to ascertain the correct manner for "brushing off" an individual.

Agent De Loach advised the Adriral that his request seemed a little umusual; that the FBI had no set manner or definite trend in the way applicants were "brushed off." He was advised that each applicant is considered individually and separately according to the merits of the prospective employee. He was additionally advised that the FBI has a set standard, such as the applicant being a member of the Bar, graduate of an accredited law school or a CPA with three years business experience.

. The Admiral seemed to understand the above remarks. It is believed there is no need for any further action regarding this ratter.

Reds Planned Early to Divide & Rule Unions

By PETER EDSON

There is no more clearly-defined front in the conflict between left and right today than in the field of American labor. The CIO particularly knows it is in a fight, with no fewer than 10 unions doing their level damnedest to retain Red-influenced leader-

This is no new struggle. Like every other aspect of the Communist war, it dates back to the earliest times of the movement in this country; specifically, to the days

before World War I.

Then Nicolai Lenin and Leon Trotsky were in America, primarily as political refugees, secondarily as explorers of another land possibly ripe for Marxism reform.

. They believed that to rule the workingman was to rule the nation. This was the essence of what was then called Bolshevism. When

the Russian revolution had eliminated the Czar, the American Communist Party immediately set about_to seek the destruction of American labor, by disinte-grating the AFL. Samuel Gompers, AFL head, was so alarmed

at the wave of strikes - notably against Big Steel and the 12-hour day, and in the case of the Boston police who created a reign of terror by their strike for higher pay— that he hurried home from Paris, where he had been advising Prest-dent Wilson at the peace confer-

Wilson's return found labor so rebellious that he called a conference of management and union leaders. Labor's demands were made by Gompers: the eight-hour day, right to organize, collective bargaining, free speech and a minimum wage. U. S. steel flatly refused to bargain; the Gomney forces walked out.

COMPANIES were made happy this. A million, or one-fourth of membership, quit organized labor. The Communists quickly organized unions to gobble up as many of these renegades as pos-

The AFL first tried to get rid of the Communists who sneaked in in 1919 and 1920 when, in 1926, it formed a Committee for the Presertate Unionism. Some of the Reds in such craft unions as the painters and the miners were driven out. But no headway could be made among the fur, needle-work, shoe and leather unions.

THE BUTCHER SHOP

In that very year Ben Gold, who admittedly was and admittedly still is a Communist, led a bloody strike by his United Fur Workers. Goon squads swept thru the New York fur district, breaking up more than 50 contract shops, bribing police who half-heartedly tried to curb them, and operating a torture chamber called "the Butcher Shop." Gold, incidentally, is still boss of the furriers.

Other great strikes of the period were those of the coatmakers, esti-mated to have cost \$35,000,000 exclusive of the split skulls, and at Passaic, N. J., where the Botany Mills were closed for more than a

After the crash in 1929, Communism gained some stature and was able to work more openly at organizing labor. Opposition to the leftists within union ranks, sapped by the depression's ghastly unem-Ployment, virtually collapsed. Observers generally agree that for the 15 years between 1929 and the last months of the war, Communists had almost a free hand,

BACKED JOHN L

Communists supported John L. Lewis when he led the United Mine Vorkers out to form the CIO at Thirty years ago, Communism was a gag to many an American—a cartoon of a dirty, wildly bearded man with a round black bomb. To-day it is no longer a gag. In the 30 years between, the United States has fought a strange and stormy war with a movement dedicated to our nation's overthrow, but a generation has grown up only vaguely aware of how the fight began or what it means. Peter Edson turns the spotlight on that 30-year war to give a revealing picture of how the Communist Party established itself on U.S. shores, what's behind the current trials, and where the fight may lead. This is the fifth of 12 dis-

Mr. Gold

Mr. Gompers

the tumultuous AFL convention of They quickly moved into the American Newspaper Guild, formed the year before, and when the new union affiliated with the CIO the job was made easier. By 1940 pinks dominated the Guild, with most of the support coming from the New York locals.

The Communists considered the Guild the key to the American labor union movement and to control of American public opinion as well. But by 1941s member-by a referentiaged the first Comship ist housecleaning by an American labor union.

HOUSECLEANING CONT'D

At the peak of their power in 1939, the Communists could claim 300 high officials in over 30 of the 40 American international unions. Ten years later they could claim control of only a dozen. They were the CIO internationals that supported Henry Wallace for

These represented a member-ing of 1,200,000, of about one-fifth of the CIO's total. Only a fraction of 1 per cent of this number could be counted as actual Communists. But at is 1949 national convention, the CIO moved de-cisively to kick them all out and start over fresh with a clean anti-

Communist slate.

The Electrical Workers—biggest of the left-wing unions—was expelled outright and its President Albert Fitzgerald kicked off the CIO executive committee. So was the Farm Equipment Workers, which had previously been ordered to merge with the Auto Workers and had refused. A new, non-Commie union of International Electrical Workers was chartered.

Trials were ordered for the

H

other 10 unions and nine of their leaders, with expulsion likely: Harry Bridges of the Longshore-men; Hugh Bryson of the Marine Cooks; Donald Henderson of the Food and Tobacco Workers; Joseph Selly of the Communications Assn.; J. F. Zurich of the Fishermen; Abraham Flaxer of the Public Workers; John Clark lic Workers; John Clark of the Mine-Mill Workers, and James Durkin of the Office and Profes-

sional Workers.

The Fur and Leather Workers' union was ordered tried, altho its president, Beri Gold, was not because he admitted being a Communist and GIO President Philip Murray ruled him ineligible to hold office on the Executive Board. This wholesale purge of the

This wholdsale purge of the American lator movement is in line with CO President Philip Murray that Cor American labor. Its sole grayose is to promote the foreign policies of Swiet Russia by gaining control of unions, spreading dissension, creating chaos.

This is the program which real American we kingmen and women have finally been awakened to reject as opposed to their own best interests.

interests.

TOMORRAW: Congress and the courts vs. Communism

Cervix Cricer Treated With Ray pactive Cobalt By Science Ser Thirty five cancer patients, chiefly

women with cancer of the cervix (neck of the womb), have during the past year been treated with cobalt made radioactive in the Atomic Energy Commission's pile at Oak Ridge, Tenni
The result are expected to be

slightly better than those that would be expected if radium had been used, altho it is too soon and too few patients have been treated to be sure of this.

The treatments are being given under the direction of Dr. J. L. Morton at Obio State University. Development of the radiocobalt was done by Dr. William Myers, physicist and physician, who is a special fellow at Ohio State.

Just the Thing for a Cave Dweller's Christmas

By TOM DONNELLY

"THE WASHINGTON DAILY ADVERTISER had reported on June 11, 1800, that the State, War, Navy and Post Office departments—all but the Treasury—had been moved from Philadelphia. It sounded impressive, but the total number of employes was only 131."

Nuggets like this turn up from time to time in "The Potomac" (Rhinehart), an ambling history of our local river which should have considerable appeal for Washingtonians who have any community spirit at all. Author Frederick Guthelm packs

in everything: the booming days of "the tobacco civilization"; John Brown; Gettysburg; Abigail Adams writing on the White House in 1800 ("We have not the least fence, yard, or other convenience, without, and the great unfinished audience room I make a drying room of, to hang up the clothes in"); a study of the growth of Washington (usually labeled "astonishing"); and a prediction that the capitol will become, in a century, "a rurban city," the larger portion of which "would flow up in the Potomac in thin ribbons of settlement, with lateral lines of development. ment branching from the Potomac up the tributary valleys."

This is the 40th volume in the

Rivers of America series. I can't imagine anyone plowing thru all 40, but, as I say, "The Potomac" should please the special public walting for it in these parts.

usually don't respond to novels which can fairly be labeled "folksy," but Ben Lucien Burman is several cuts above the standard specialist in rustic humors, and his latest effort, "Everywhere I Roam" (Doubleday) is a fresh and lively

There isn't much in the way of plot. An elderly Cumberland mounpiot. An enerry cumberiand mountaineer, appalled by the belching steel mill which threatens at any moment to expand all over his homestead, loads his family on a rickety wagon and sets out to find if there's a spot in the country, where people still live decently, the way they used to at the time of the St. Louis Fair. "I've read plenty, and I've talked to plenty of people," Mr. Burman's hero says, "and way everybody says, ever since the Exposition things has been going down and down."

The old man doesn't find his gar

den spot, and what with one thing sert him, the girls for romance, the boy for railroading. He does get to ter to distant receivers.

see quite a lot of the South, tho, and has some fine comic adven-tures when he tries to operate a touring show which offers an apathetic public a baby alligator, a Gila monster, a rattlesnake, and a decaying parrot barely able to whistle "Yankee Doodle."

"Everywhere I Roam" is a modest effort, to be sure, but its inno-cent pathos and gentle humor are most attractive.

IT was inevitable that the huge-success of "White Collar Zoo" would inspire a sequel. It is only slightly less inevitable that the sequel "Home Sweet Zoo" (Doubleday) should not be as funny as the original. After all, very few jokes get better the second time around. Even so "Home Sweet Zoo" is sufficiently droll to be worth your attention. Once again Clare Barnes Jr. has coupled animal pictures with typically human bits of dialogue. My favorite entry is a semi-submerged polar bear crying "Maybe you'd better phone the plumber after all, dear," but I also find all the pictures dealing with cats uproarious.

Chart Paper Printed by Electric Discharge

By Science Service NEW YORK—Chart paper for use particularly with commercial facsimile telegraphy, but usable in many types of recording instru-ments has a coating of electro-sensitive material which is "printed"

by an electric current passing to it from a simple wire stylus. The new paper, dubbed Teledeltos, was developed by the Western Union Telegraph Co. It meets the requirements in facsimile recording by being instantaneous dry and by being instantaneous, dry and permanent. The coated paper is light gray. The current flowing thru it produces a black mark.

In preyious facsimile transmis-sion, the record was made photo-graphically by a beam of light on photo-sensitive paper. Facsimile is a system, now coming into wider usage, in which an entire printed page, letter, message or photograph wire connections from a tran

A DISHONEST RESOLUTION

THE American resolution presented to the United Nations General Assembly by Dr. Philip C. Jessup in the Chinese-Russian dispute is a hypocritical evasion of the issues upon which China has asked - the member nations to pass judgment.

It is a contradiction in part of the State Department's own official White Paper or China, which Dr. Jessup himself edited.

If adopted in its present form, the resolution will be a left-handed approval of everything Russia has done in Manchuria and China.

China asked the United Nations to pass on accomplished facts and stated acts of Russian aggression. But the American resolution is worded as the none of the acts of which China has complained had

DR. PHILIP C. JESSUP

taken place. It deals only with the present and the future, not with the past.

Dr. Jessup's speech in support of his resolution was more forthright than the resolution itself, in that it contained a restrained_criticism of Soviet acts in Manchuria. But there is not one word of condemnation or criticism in the resolution itself, nor is the Soviet Union mentioned.

The resolution calls upon all nations "to respect the political independence of China and to be guided by the principles of the charter in their relations with China." This in the face of the published fact that Russia set up a puppet government in Manchuria months ago—long before the Chinese Communists announced the formation of their own "government" at

It also asks all nations to "respect the right of the people of China now and in the future to choose freely their political institutions and to maintain a independent of foreign control." This at a time when Red troops control most of China. In what country in the world have the people had a voice in the formation of a government when Red troops were in control?

Finally, the resolution asks member nations to "refrain from seeking to acquire spheres of influence or to create foreigncontrolled regimes within the territory of China," and from "seeking to obtain special rights and privileges" in such territory.

This is crowning evasion with deceit. President Roosevelt and Winston Churchill promised Stalin "special rights

QUIT GRUMBLING! HALF A STRIKE

and privileges within the territory of China" at Yalta in February, 1945. These included the right to establish a Soviet naval base at Port Arthur, the right to control the commercial port of Dairen, and the privilege of operating the Manchurian railroads.

COLD COMFORT!

These concessions were made without work o consulting China and the United States notice. forced China to accept them. This is admitted on Page 116 of the White Paper which states: "The American position was that the Yalta agreement should be complied with-no more, no less."

Russia used these concessions to secure control of the rest of Manchuria anc to aid the Communists in their conquest of China

The United States Government has atultified itself by offering this resolution to the United Nations, and the UN would stultify itself by adopting it.

THE MINERS PAY-AND HOW!

THE coal miners certainly are paying a high price for whatever it is John L Lewis may think he is accomplishing.

Out of 234 possible working days so far this year, the 380,000 bituminous miners most 80 because of strikes or short works parent. weeks ordered by Mr. Lewis.

The loss of wages that might have been earned in 80 days amounts to approximate ly \$1200 for the average miner.

And, if the three-day week now order by Mr. Lewis continues thru December the possible working days not worked 1949 will be almost 90, and the potent earnings lost to the average miner will approximately: \$1350.

On March 11, the miners went out for two-week strike because Mr. Lewis si they must protest the appointment of James Boyd as director of the

reau of times. The U.S. Senate promptly confirmed the approprient.

On June 13, they went our for a week which Mr. Lewis termed "a stabilizing period of inaction."

On June 30, he decreed that they should work only three days a week until further

On Sept. 19, Mr. Lewis ordered a "noday week" to enforce pension, welfare and other demands which he never yet has explained clearly to the miners or the public. That Strike Company to 52 days,

On Nov. 9, Mr. Lewis, professing concern for "the public convenience," them back to work for three full-time

Yesterday, that period having expired, they struck again, and a few hours later he ordered them to resume work, on a three-day week, beginning next Monday,

So, back they'll go, hoping to earn a little cash for Christmas, but not knowing that Mr. Lewis won't call them out again at any moment.

If the miners have any prospect of gains to show for all their losses, all the turmoil they've gone thru, all the economic damage done to the country and all that may be done by shortages of coal in the winter east of the Mississippi have been idle at months ahead, that prospect is not ap-

> Only John L. Lewis knows-if, indeed, even he knows—the purpose of his tactics. If it is just to prove how powerful he is, that demonstration is totally unnecessary.

> The country already has had super-abundant proof that immunity from the anti-trust laws enables this one man to abuse monopolistic power greater than that any industrial combination ever had.

> And the coal miners already know only too well that the dictator of their union has power to punish individuals or groups who might dare defy his edicts—power to om even if it means their ruin.

Egghead Accepts the Nomination

"Reader's" information, am not bad at all, certainly not as bad as Eleanor or Ickes.

I just smell that way now because I am deep in the hills of West Virginia and my Uncle Dud, who resembles an Italian laborer, left the top off his vat of working mash and I fell into it. This is one run of sugar whisky that will probably taste like wool shirts, leather boots and Washington gaso-

Like Harpo Mark, it seems that most of my life has been spent either running after or away from something, except for four years military duty when the Articles of War caused considerable change in my schedule. Naturally, due to extended research in public libraries thru the works of Rabelais, Thorne Smith, Veblen, the Marx brothers (Karl and Groucho), Louise Alcott, Willa Cather, Somerset Maugham, Ambrose Riegre, the Royer Roys. Ambrose Bierce, the Rover Boys, Tarzan, and the latest science ic tion, I feel that by experience, edu-cation and general instability I am-superior to the other presidential candadates.

I not only don't expect to keep my campaign promises, I don't ex-pect to make any, if I run. While I would much prefer to run for a blond that for President, if "Reader" insists I shall make a feeble attempt in 1952. As for the Party, I am sure the Eggheads of America can throw a better one, whatever—
it is:—As the chorus girl said, I would rather be wronged than not have a mink coat at all, or was it rather be right than—well—
Uncle Dud, ain't that half-gallon jar drapped full of no singling's yet?
I got a powerful thirst. Politics is I got a powerful thirst. Politics is fer wimmen folks.

EGGHEAD McGINTY. (Along Cheat River, W. Va.)

She'd Swap Smoothness for Some Tough Policy

T CERTAINLY admire your articles concerning our getting out of China. I am not an Executive in any place. I am just a plain practical woman. But, concerning our foreign affairs management, I think most anyone—with ordinary common sense, and a high a

cation—could do a much Stalin must laugh hard that he almost h tache when he sees ho executives are. Char and warm hand shall save our Country. It if the inner self had endefinite—to harmonical qualities. I prefer some proper stuff within.

WHO IS DR. JESSUP?

DR. PHILIP C. J. UP, the American spokesman in the urrent United Nations debate on Nationalist China's charges against the Soviet Union, is the same Dr. Jessup chosen by the State Department to draft a new American policy for the Far

For this reason, his past associations and attitudes have become of general public concern.

Over asperiod of years, Dr. Jessup held various positions in the Institute of Pacific Relations, including the chairmanships of its American and Pácific Councils. In these capacities he was in close association with such well-known left-wingers as Anna Louise Strong, Guenther Stein, Har-

riet Lucy Moore, E. C. Carter, Theodore A. Bisson, Andrew Grajdanzev and Frederick

Vanderbilt Field. While the institute's publication, the Far Eastern Survey, was under Dr. Jessup's direction, it began a campaign against Nationalist China. Referring to what it called the "two Chinas," it said in an article signed by Mr. Bisson: "One is now generally called Kuomintang China, the other is called Communist China. However, these are only party labels. To be more descriptive, the one might be called feudal China, the other democratic China."

Thus began the long campaign to tear down Chiang Kai-shek and present the Chinese Reds to the American people as democrats and simple agrarian reformers. We know them better than that now. But that is due to no contributions by Dr.

The Communist front organizations with which Dr. Jessup has been affiliated or has sponsored include the American-Russian Institute, the National Emergency Confer-ence (organized in 1939 to protest the deportation of aliens who advocated changing our form of government), the National Emergency Conference for Democratic Rights and the Co-Ordinating Committee to Lift the Embargo—on Red Spain.

He was one of 12 signers of a letter in The New York Times Feb. 16, 1946! urging the United States to suspend the manufacture of atomic hombs following and

facture of atomic bombs, following appointment of the United Nations Commis-

sion on Atomic Energy.

This letter urged, in order that the discussions on atomic energy control might proceed in an "atmosphere of good faith

1. "The United States at once stop the production of bombs from material currently produced"—this to include the prepprocedures involved in the fabrication of the bomb," pration of sub-assemblies and "all other

2. "For one year, which would seem to be a reasonable time for the commission to mature its plans and to secure action on them by the governments concerned, we will stop accumulating purified plutonium and uranium 235, which are the essential ingredients of atomic bombs."

The letter to The Times added that any fissionable products developed while keeping the atomic energy plants on a stand-by basis should be dumped in the ptean or returned to their original mixture.

Since the Russians claim they began making bombs in 1947, they might have caught up with us or passed us in atomic bomb production had Dr. Jessup's views prevailed.

Dt. Jessup way a character witness for Alger Hiss at his first perjury trial.

-He was the editor of the State Department's White Paper on China, which one student of the subject characterized as a "bulky compendium of many truths, some half-truths and frequent contradictions of published and acknowledged fact."

Here at best we have the picture of a confused liberal feeling his way around in circles and often finding himself in duestionable company. Certainly it is not the record of a man who should be chosen to formulate anything of such tremendous potentialities as an American policy for the Far East.

Imagine sending a Dr. Jessup to preside over a conference on Far Eastern affairs at Bangkok, when we have a man like Gen: Douglas MacArthur in nearby Tokio!

If this is the way American foreign policy is being made, God save us from the Russians.

DATE: November 29, 1949

FROM

SUBJECT:

CENTRAL INTELLIGENCE AGENCY INVESTIGATIONS

Reference is made to your inquiry concerning the request of Colonel Sheffield Edwards for a conference at the Bureau regarding CIA investigations. Investigations

BACKGROUND:

HEREIN IS UNCLASSIFIED

Per OG A

DATE 5-21-99 BY GOZGINISEPINE

You will recall that in answer to an inquiry from the Bureau of the Budget, Mr. Glavin on October 25, 1948, in accordance with Mr. Tolson's instructions advised Mr. Gus Moe, of the Bureau of the Budget, that the Bureau would be in a position to handle investigations for CIA through the fiscal year 1950 at \$200 per unit cost. This advice was given to Mr. Moe on October 2 -/ 25, 1948.

Thereafter on November 12, 1948, Admiral Hillenkoetter advised Mr. Ladd that CIA would desire the Bureau to conduct these investigations.

On November 18, 1948, Mr. James E. Webb, the Director of the Bureau of the Budget, advised the Attorney General that it was his understanding that the Bureau would be in a position to handle the investigations.

On December 2, 1948, the Attorney General wrote Admiral Hillenkoetter advising him that the Bureau would be in a position to undertake the investigations during the remainder of the fiscal year 1949 and the fiscal year 1950 at \$200 per case. The Attorney General stated that he trusted that mutually satisfactory arrangements could be worked out between CIA and the Bureau concerning these investigations.

Memorandum for Mr. Ladd

investigation was not to be disclosed during the course of the investigations. CIA would furnish such information necessary to the FBI to allow them to conduct the investigations and this information would include any pertinent information already in the possession of CIA.

The Bureau agreed to conduct semi-covert investigations for CIA, that is of individuals who were estensibly working for some other Government Agency but were actually performing functions for CIA. CIA was to notify us of any applicants in this status. It was also agreed that the FBI would accept a reasonable number of investigations as "expedite or priority" cases provided this number was kept at a minimum, and it was finally agreed that CIA would reimburse the Bureau in the amount of \$200 per investigation. The Director's letter to Admiral Hillenkoetter dated December 17, 1948, approved the agreement.

The Bureau commenced conducting these investigations for CIA on

FBI INVESTIGATIONS FOR CIA:

mately per month since that time. As of November 25, 1949, we had closed cases. We had pending on that same date cases.
RELATIONS WITH CIA CONCERNING APPLICANT CASES:
Our relations with CIA with regard to the handling of these applicant investigations have been excellent. We have experienced no difficulty and CIA has on several occasions expressed its satisfaction with the investigations. of CIA, has expressed himself on several occasions as being entirely satisfied with the investigations, and in conversations with Mr. Callan from time to time, have also indicated that the investigations were of great value to CIA and have praised the Bureau's conduct of these investigations.

b3

On July 14, 1949, while discussing other matters with Admiral Hillenkoetter, the Admiral mentioned to Agent DeLoach, of the Liaison Section, the excellent manner in which the FEI investigations were being conducted. On that occasion he stated he had personally observed several of the reports which contained detailed and concise language and which were "reports that any agency could be proud of."

Memorandum for Mr. Ladd

OBSERVATIONS CONCERNING OUR CONDUCT OF CIA INVESTIGATIONS:

These investigations are conducted by agreement and agreement agreement and agreement agreement.

These investigations are conducted by agreement and not under the sanction of a public law. Since CIA wants the investigations we have had no trouble concerning them. There has been no fault found with the Bureau concerning these cases but on the other hand only praise and appreciation. CIA has held its requests for expedite investigations at a minimum. They have been satisfied with 60 and 90 day dead lines respectively and have not pressed the Bureau for expedite action as have some other Government Agencies, which practice results in inconvenience and a waste of time and moneyas far as the Bureau is concerned. They have scrupulously adhered to their agreement and have forwarded the investigations to us in an even flow, which has not been true of some of the other Government Agencies. In short, there has been no conduct on the part of CIA with regard to these applicant cases to which the Bureau could take any exception whatsoever.

It will be recalled that CIA had established a staff of investigators and had opened some field offices for the purpose of handling these investigations. They had made very little progress in this regard so far as disposing of the back log of applicant cases which confronted them. It was necessary, however, for them to curtail their activities in this regard and it will also be recalled that when we discontinued the handling of applicant investigations for CIA under the previous program, we first advised them of this action on September 30, 1947. We accepted no cases after December 31, 1947, yet at the time the program was re-instituted a year later it was found that CIA while they had in that length of time set up an investigative organization, they had made relatively little progress in handling this phase of their work.

It would appear that in view of the satisfaction which has been con-
tinuously expressed by CIA with the investigations as conducted by the FBI
desires to request the Bureau to conduct the investigations
beyond the present contract date which is June 30, 1950. On occasion he has
expressed himself to the effect that he hoped the Bureau would continue to
conduct these investigations. It is rather evident, therefore, that the purpose
of request for a conference is to convey to the Bureau the
desire of CIA for the Bureau to continue these investigations.

We have in our 1951 budget estimate given consideration to the estimated work to be referred to the Bureau by CIA on a reimbursable basis, which at the increased figure of \$206.40 per unit case would result in a reimbursement to the Bureau by CIA of \$504,000 during the fiscal year 1951.

RECOMMENDATION:

Inasmuch as the CIA applicant program would result in a reimbursement

Memorandum for Mr. Ladd

to the Bureau during the fiscal year of 1951 in the amount of \$504,000 and since it will also serve the continued purpose of giving CIA no excuse to maintain a domestic investigative staff and further since the investigations appear to be desired by CIA, their satisfaction with them having been expressed on many occasions, since the dead lines are not such as to cause the Eureau any serious inconvenience and the cases are referred to the Bureau in an even flow so that we are able to count on them periodically, thus avoiding their handling on an emergency basis, and lastly since CIA has observed its contract during the time in which we have conducted these investigations and our relations regarding them have been entirely satisfactory, it is recommended that, provided the same agreement can be reached with the exception of the fact that the Bureau should obtain more money per case because of the uniform pay increase (which the Administrative Division estimates to be \$206.40 per investigation), we continue the present agreement in the event Colonel Edwards requests it for the fiscal year 1951.

ADDENDUM - December 1, 1949

At a meeting of the Executives' Conference on December 1, 1949, attended by Messrs. Tolson, Glavin, Parsons, Mohr, Carlson, N. McCabe, McGuire. Fletcher. Rosen and Ladd, it was pointed out to the of CIA has requested an appointment conference that with Mr. Ladd for 9:30 AM December 2, that he has indicated that he wants to request the Bureau to agree to investigate CIA applicants on a permanent basis. If this is not agreeable, to request an agreement covering the next two fiscal years. The views in the above memorandum were called to the attention of the conference.

Mr. Tolson was of the opinion that CIA be advised that we could not continue to conduct their investigations for them beyond the end of the fiscal year 1950.

Mr. Tolson was of the opinion that the Bureau loses money conducting these investigations for \$200 a case and further felt that the Bureau had too much work of its own without handling the investigations of CIA.

Messrs. Glaving, Parsons, Mohr, Carlson, N. McCabe, McGuire, Fletcher, Rosen and Ladd were of the opinion that for the reasons stated in the above memorandum that the Bureau should agree to conduct these investigations for CIA for one year, namely through the fiscal year 1951 and not commit the Bureau further at this time. with any of the land of the la

The Director

ADDED COST OF INVESTIGATIONS:

	·
	stated that from a budget standpoint the present arrange-
	ment was highly satisfactory and that the Bureau of the Budget had raised no
ŀ.	question concerning it except that the representative of the Bureau of the
	Budget to CIA had questioned the figure of \$200, feeling that it was perhaps
П	a little high. It was explained to him that this was the usual figure on in-
ı	vestigations of this nature and that it was based upon cost analyses and that
	as a matter of fact in the event the Bureau could continue the present arrange-
	ment for the next fiscal year, because of increased costs to the Bureau
	occasioned by the recent uniform pay raise, the investigations would cost
	\$206.40 each. stated that he understood the reasons for the
H	increased cost and that it would occasion no difficulty on the part of CIA.

FORMAL ACCEPTANCE OF A NEW CONTRACT:

stated that as far as CIA was concerned he could see no reason for drawing up any new agreement and that in the event the Bureau could conduct these investigations for CIA, an exchange of correspondence merely continuing the present agreement in effect would be satisfactory. He was advised that this matter would be brought to your attention and that the Bureau's answer would be forthcoming as soon as consideration could be given it.

Memorandum to the Director

This matter had been previously submitted to the Director and the majority view of the conference on December 6, 1949 was approved by the Director outlining the following reasons which motivated the majority of the conference in its decision. These reasons are as follows:

- 1. CIA desired the investigations and was requesting continuation of the agreement.
- 2. CIA had scrupulously observed the agreement.
- 3. CIA had expressed itself as being eminently satisfied with the investigations.
- 4. The dead lines were such that no serious inconvenience was caused the Bureau in handling these investigations.
- 5. The cases were referred to the Bureau by CIA in an even flow so that no emergency situations were created.
- 6. The conduct of these investigations by the Bureau gave CIA no excuse for the maintenance of a large investigative staff in the domestic field.
- 7. The arrangement would result in a reimbursement to the Bureau during the fiscal year 1951 in an amount of \$504,000.

Following the Director's approval of the recommendations, a letter was forwarded to Admiral Hillenkoetter on December 12, 1949.

RECOMMENDATION

The Executives' Conference with the exception of Messrs. Tolson, NEASE Glavin and Mohr recommend that we continue our policy for the reasons indicated above. Those opposing indicated that they were opposed to continuing because we had too much work of our own to do and that we, therefore, could not afford to handle these investigations. As the considerations still prevail the majority were in favor of again approving the existing policy. There has been no breach of the contract as yet by CIA. Our present agreement takes, through to June 30, 1951.

Those in attendance were Messrs. Tolson, Ladd, Harbo, Glavin, Nichols, Mohr, Tracy, Carlson, Fletcher, N. H. McCabe and Rosen.

Respectfully, For the Conference

Clyde Tolson

MR. FLETCHER INFORMATION CONTAINED

FROM : Mr. Rose HEREIN IS UNCLASSIFIED February 6, 1950

DATE 5-21-99 BY 60262 MUSEPINF SUBJECT: Per 06A
For your information this is to advise that

Pat Coyne called on the telephone today and referred to a letter which was sent by the Bureau to Admiral Souers, indicating that Billy Rose had furnished information to the Bureau to the effect that a couple of CIA representatives had approached Rose for a "cloak and dagger" job. Souers told Pat Coyne to call the Bureau with reference to this letter and advise the Bureau they are not taking any further action in

the matter, since he was considering the letter as on merely for his information.

In view of the fact that this was sent to Souers and was not sent to CIA, it would appear advisable to furnish the information to Hillenkoetter if we want CIA to know that this information has come to our attention.

Office Memorandum • United States Government

TO: MR. H. B. FLETCHER MINTORMATION CONTAINED February 16, 1950
FROM: V. P. KEAN DATE 5-21-99 BY 60267 NISEPIN SUBject: Lieutenant general alfred maximiliant shuenther Details

Reference is made to my memorandum to you in the above-captioned matter dated February 9, 1950, reflecting background information concerning the above-captioned individual.

You will recall that General Eolling confidentially advised
Mr. Reynolds that he had learned that General Gruenther was the choice of
Secretary of Defense Johnson to replace Admiral Hillenkoetter as Director
of the Central Intelligence Agency. As noted in the referenced memorandum
General Bolling advised that he would attempt to obtain additional intelligence concerning General Gruenther and advise the Bureau.

General Bolling has now advised Mr. Reynolds that he has reviewed General Gruenther's personnel file and has ascertained that he has an outstanding personnel file. General Bolling stated that General Gruenther has been classed as one of the three outstanding General Officers on active duty by General Eisenhower and General Bradley, former Chiefs of Staff. General Bolling confidentially advised that in reviewing General Gruenther file he was impressed with the fact that the efficiency ratings given deh fall Gruenther when he had direct control of troops were not nearly as outstanding, in fact relatively low ratings, as compared to When he was in a staff assignment. General Bolling concluded from this that apparently General Gruenther had difficulty in "getting along with and controlling people."

General Bolling advised Mr. Reynolds that he personally felt that the choice of General Gruenther to be Director of the Central Intelligence Agency would be very ill-advised. He stated that from his observation General Gruenther "talks too much"; further, that he would likely "run wild and get into everyone else's field" and only use the job as Director of Central Intelligence to gain the assignment as Chief of Staff.

General Bolling stated that it is his personal opinion that the Director of the Central Intelligence Agency should be a civilian who would owe allegiance to neither the Army; Navy or the Air Force and who would assume the Directorship of that organization as a career.

It should be noted that the remarks of General Bolling, as indicated and quoted above, were furnished to Mr. Reynolds in extreme confidence.
